manufactured by the Electro-Motive Division of General Motors.

While the 645 series was intended primarily for locomotive, marine and stationary engine use, one 16-cylinder version powered the 33-19 "Titan" prototype haul truck designed by GM's Terex division.

The 645 series was an evolution of the earlier 567 series and a precursor to the later 710 series. First

dominance in the locomotive marketplace. The diesel engine was born from a need to offer increased horsepower since the reliable model 567, which had been in production since 1938 and finally reached the limit of its capabilities. The new prime mover was first tested in the early 1960s and with this success entered production a few years
