Unlike traditional origami that uses a single sheet of paper to fold a figure, modular origami uses many sheets of paper that are folded into basic modules or units. Once you learn how to make the basic unit for a design, you repeat the process to make enough copies of the unit to assemble your final form.

### **Teaching Math With Modular Origami | Scholastic**

Fold the second paper in half, and cut on the folded line. Label each of these halves "1/2." Fold your third paper into thirds, cut along the folded lines, and label each third "1/3."

### **Fraction Fun | Lesson plan | Education.com**

The fold line is traced with a crayon or colored pencil, and each part is marked with fraction  $\frac{1}{2}$ . Because the Common Core Math Practices require students to attend to precision, the folding of the fraction strips accurately is very important especially as each fractional pieces decrease in size. The folding continues with orange for the fourths.

### **Third grade Lesson Creating Fraction Strips | BetterLesson**

Paper Folding We sequence the use of paper strips after fraction circles for students to extend and reinforce key ideas about unit and partitioning. Students again have to coordinate the meaning of the numerator and denominator with this new model.

### **Using Models to Build Fraction Understanding in ...**

Paper Folding. This is a youcubed favorite which comes from Mark Driscoll. The activity encourages students and teachers to engage in visual, creative thinking. We have coupled Mark's activity with asking students to reason and be convincing, two important mathematical practices. Task Instructions. Work with a partner.

### **Paper Folding - YouCubed**

To make  $\frac{1}{3}$  pieces and  $\frac{1}{6}$  pieces, start by folding a paper plate in half and cutting along the fold. Then fold one side of each half over  $\frac{1}{3}$  of the way and fold the other side over. Carefully line up the edges, crease the folds, and cut along the folded lines. Label these as  $\frac{1}{6}$ .
