The normal \mathbf{n} to S is defined by the right-hand-screw rule in relation to the sense of the line integral around C . $\oint_C (\mathbf{V} \times \mathbf{A}) \cdot d\mathbf{l} = \int_S \mathbf{A} \cdot d\mathbf{l}$ (Stokes's theorem) $\oint_C \mathbf{n} \times d\mathbf{l} = \int_S \mathbf{w} \cdot d\mathbf{a}$

Classical Electrodynamics, 3rd Edition | Wiley

In the third edition, some materials, such as those on magnetostatics and electromagnetic induction, were rearranged or rewritten, while others,

such as discussions of plasma physics, were eliminated altogether. One major addition is the use of numerical techniques. More than 110 new problems were added.

David Jackson's
"Classical
