Here are some common side effects that can occur after cataract eye surgery: I have dry eyes after cataract surgery. Cataract surgery has been found to amplify a pre-existing dry eye condition, as well as induce it in patients who did not have dry eyes prior to the procedure.

4 Common Side Effects After Cataract Surgery | Neovision ...

Secondary cataract. Loss of vision. Your risk of complications is greater if you have another eye disease or a serious medical condition. Occasionally, cataract surgery fails to improve vision because of underlying eye damage from other conditions, such as glaucoma or macular degeneration.

Cataract surgery - Mayo Clinic

PCO is one of the most common cataract surgery complications. "Posterior Capsule Opacity", a condition arising from the abnormal proliferation and growth of lens epithelial cells on the capsule during the surgery. These cells can affect the vision by migrating to the posterior capsule and hindering the visual axis.

Cataract Surgery Complications to Look Out for | IrisVision

One of the most common cataract surgery complications is a posterior capsule opacity (also called posterior capsule opacification or PCO). Although some people call PCO a "secondary cataract," it really is not a cataract. Once a cataract is removed, it does not come back. During cataract surgery, your surgeon will remove the cloudy natural lens

Cataract Surgery Complications, Side Effects, Risks

While cataract surgery is one of the safest procedures available with a high rate of success, rare complications such as infection (endophthalmitis) or bleeding can arise. Your ophthalmologist will discuss the specific potential complications of the procedures that are unique to your eye prior to having you sign a consent form.
