Almost exactly two years after the D80 was announced comes its replacement, the rather predictably named D90. The D80 has been one of Nikon's quiet successes, and even today, despite being positively Methuselah-like in digital camera terms it continues to sell and often makes its way into our top 10 most clicked on cameras. Because it looks so similar to the D80 the D90 appears at first glance ...

Nikon D90 Review: Digital Photography Review

Nikon D90 was the first revolutionary Digital Single-Lens Reflex (DSLR) that was introduced for consumer usage in 2008. It was the first of its kind that allowed users to capture HD (720p) videos. Now, 12 years later, it is still a worthy product, having stood the test of time admirably. A lot of innovative changes have happened during this period.

Best Lenses For Nikon D90 - Digital Camera HQ

Nikon D90 automatically uses this option in a Close-up scene mode. In this mode, you have to select the focus point manually by using the multi-selector button (thump pad) on the back of the camera. 2. Dynamic area. When you select this mode, you can select the focus point but the D90 can use other focus points as well if the subject moves.

The lens shown here is the Nikkor 18-105mm AF-S VR (Vibration Reduction) model sold with the D90 kit; other lenses may vary. Camera controls marked with an asterisk have multiple functions.

Nikon D90 For Dummies Cheat Sheet - dummies

Focal length, usually represented in millimeters (mm), is the basic description of a photographic lens. It is not a measurement of the actual length of a lens, but a calculation of an optical distance from the point where light rays converge to form a sharp image of an object to the digital sensor or 35mm film at the focal plane in the camera.
